

Full Video Conferencing Capabilities in the Field

First Responders and users who operate in the field often need the full functionality of a room based codec they can deploy out of the office.

Benefits

Flexibility to run as a Cisco RoomOS device to connect to CUCM/Webex Cloud or as a native Microsoft Teams Room device

Leverage the power of full conference room functionality in a portable, ruggedized package anywhere

Connect external audio visual components like the Cisco PTZ 4K camera and other supported devices for full room based codec capabilities

Product Overview

Room based video conferencing is a crucial tool for today's business processes as immersive virtual meetings enhance communication between departments and agencies. But what happens when you need this capability and you are away from the familiar confines of your own conference room? The second generation CIS Secure First Responders Webex Kit (DTD-FRWXKIT-02) enables the full power of that collaborative environment anywhere in the office or out in the field. This ruggedized, portable video conferencing solution can function as a stand alone device in the back of a vehicle or in a make shift conference room with AV components in a remote field office.

The DTD-FRWXKIT-02 is built around the Codec EQ from the powerful Cisco Room Series of collaboration devices. The Codec EQ can run Cisco's RoomOS connecting on-prem to the Cisco UCM or to Cisco Webex cloud while also being capable of natively supporting the Microsoft Teams Rooms experience. The unit is equipped with an HD display, built-in Cisco Navigator touch panel and the ability to seamlessly attach another Cisco supported external camera, microphone and headset. The DTD-FRWXKIT-02 has the ability to present content from a USB-C or HDMI port that can be shared to two external displays via HDMI ports for full codec functionality.

Key Features

Touch Screen Controls

Supports External Cam

Ruggedized Case
