

TSG-Approved for a Headset or Webcam

Need to connect a single USB device to your softphone and maintain TSG compliance? We have you covered.

Benefits

Provides full TSG Positive Disconnect capabilities for soft phone users with laptops or desktops

Simple to install and connect to compute devices without technical expertise

TSG-approved headset and webcam collaboration peripherals available from CIS Secure

Product Overview

The CIS Secure DTD-TSGPD-USB-01 is a TSG-Approved USB isolation device which provides a positive disconnect solution for video or audio softphone communication applications. The DTD-TSGPD-USB-01 is a simple solution designed to connect a TSG-compliant USB peripheral such as a webcam or headset to a workstation running any approved softphone or collaboration software including Cisco Webex, Cisco Jabber, Microsoft Teams, Zoom and many others. This single port device features a manually activated TSG button and an LED indicator which illuminates when the mechanism is engaged. The DTD-TSGPD-USB-01 is equipped with a switch that times out automatically unless the user manually deactivates, or manually extends the timer. The timer is factory set for thirty (30) minutes and may be modified to customer specification with the proper approvals.

Product Specifications

Product #:	DTD-TSGPD-USB-01
