

CIS Secure TSG Conference Phone

Collaboration with team members often happens in a conference room. The TSG certified CIS Secure Poly Trio 8300 ensures those discussions are secure

Benefits

Start a meeting in seconds with one-touch join

Tune out distractions and keep everyone engaged with Poly NoiseBlock technology

Future-proof flexibility with the option to easily add video conferencing and content sharing accessories.

Product Overview

The Poly Trio 8300 Conference Phone is a conferencing solution for small to large meeting rooms. The phone allows users to join meetings quickly and effectively in just seconds with the touch a button. The Trio 8300 provides rich audio conference calls with Poly NoiseBlock technology to turn out distractions and keep everyone engaged. The phone is designed with flexibility in mind allowing for connectivity to multiple platforms simultaneously, ideal for hybrid environments.

The CIS Secure DTD-TRIO83-XX is a TSG modified version of the commercially available Polycom Trio 8300 Conference Phone. The DTD-TRIO83 connects to your network like any other Poly Trio 8300 phone, the difference is the addition of Positive Disconnect On-Hook Security. While in a call, users can control the phone with a secure Mute/Hold operation with the click of a button, simplifying the method to secure communication and fully demonstrating the capability of the product. The USB ports are disable and not for use within design as well as the Bluetooth wireless function. The DTD-TRIO83 is available with external Mic Pod (sold separately) with ensure voice communication during the call is beyond expectation.
