

TSG-Protected VTC at the Desktop

Get secure video collaboration at your desk without the clutter of separate peripherals like a display, camera and audio.

Benefits

Enable full video conferencing capabilities at the desktop with a Class A TSG-approved device

Enable flexible deployment scenarios with an endpoint capable of registering to an on-prem CUCM system or to the Cisco Webex Cloud

Reduce the clutter on your desk with an all-in-one desktop device with an HD camera and touchscreen interactive whiteboard display

Product Overview

The CIS Secure DTD-WXDESK is based on the Cisco Webex Desk, the successor to their DX80 desktop video conferencing platform. The Webex Desk is an all-in-one solution designed for use at the desk or in a shared area optimized for a collaborative environment. The Desk features an interactive high-definition touchscreen display, full-range speakers, integrated microphone and built-in HD camera. This multi-faceted device offers the user the flexibility of a full range of collaboration capabilities at the desktop in a single device enabling a modern workflow designed to optimize productivity while maintaining security.

The CIS Secure design of the DTD-WXDESK enhances the purpose-built collaboration capabilities of the Cisco Webex Desk to make it a TSG-approved Video Teleconferencing (VTC) device. CIS Secure leverages our significant experience in secure collaboration to continue our innovative approach to developing secure VoIP and video endpoints. Our TSG-compliant Cisco Webex Desk is the latest addition to our industry leading portfolio of secure VTC solutions approved by the the National Telecommunications Security Working Group (NTSWG). Since the NTSWG published their guidance requiring that VTC appliances in secure areas must be TSG-approved, CIS Secure has worked diligently on enabling our government and security-conscious customers to have the confidence that we are helping to secure the mission.
